

Expensify Launches Native Integration With Campfire

October 15, 2026

Two-way sync brings expenses, corporate card spend, and reimbursements directly into Campfire's general ledger

SAN FRANCISCO--(BUSINESS WIRE)--Oct. 15, 2026-- Expensify (Nasdaq: EXFY), the easiest way to do your expenses, travel, and corporate cards, today announced a native, two-way [integration](#) with Campfire, the AI-native ERP built for fast-growing companies. Finance teams running on Campfire can now connect Expensify in minutes and keep expenses, card spend, and reimbursements in sync with their ledger automatically.

With the integration:

- **Campfire's chart of accounts** syncs into Expensify as categories, with departments and other dimensions as tags, and tax rates where available.
- **Out-of-pocket expenses** post to Campfire as vendor bills, matched to the employee who submitted them.
- **Company card transactions** post as journal entries and can be routed by card program or individual card.
- **Card settlements and ACH reimbursements** post to Campfire as payments.
- **A daily sync** exports expense reports to Campfire on an accrual or cash basis.

"Campfire customers already run their close on AI," said Nick Tooker, Head of Partnerships at Expensify. "Now their expenses land in the ledger already coded, so nobody is exporting spreadsheets at month end."

The Expensify-Campfire integration is available now. [Learn more](#) or [get started](#) today.
